INTERMODAL LTL TRANSPORT REDUCES YOUR COST AND YOUR CARBON FOOTPRINT

Our flagship service to Western Canada incorporates a combination of road and rail assets to offer significant savings over traditional highway LTL service. It is a growing segment of our business and with better planning, the cost savings does not have to be paired with a delay in service. By working back from your required date of delivery, this more strategic planning effort can go right to your bottom line, without comprising your delivery schedules.

Our specialty is picking up your dry goods, consumer products, packaging and industrial materials from the Greater Toronto Area and shipping by rail to Calgary, Edmonton and Vancouver. We also serve all Ontario and Western Quebec origin points to the west. Beyond destinations like Fort McMurray, Kamloops, Kelowna, Prince Rupert and Victoria are all part of our service area.

“ WE’VE MADE IT A PRIORITY TO KEEP OUR BUSINESS PHILOSOPHY ABOUT RELATIONSHIPS, ACCESSIBILITY, FLEXIBILITY AND RESPONSIVENESS. GOT A PROBLEM? WE’LL FIND THE SOLUTION... NOW. ”

WE TAKE TO THE HIGHWAY ON A DAILY BASIS

For better control and faster transit times, our highway service is the way to go for your Western Canada LTL. Serving the outbound requirements of Toronto, Montreal and surrounding areas, we deliver consolidated savings and timely deliveries to Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver and Victoria. Both single and team driver service is available. We provide service for your dry goods and during Canada's winter months our “protect from freezing” service is a popular option.

LTL SERVICE FROM THE CAROLINAS TO CALIFORNIA

Regardless of the origin or destination, KTS can provide an LTL solution to make shipping between Canada and the USA as easy as shipping across town. Our team understands every aspect of shipping LTL between our countries and works closely with our strategic partners to ensure delivery schedules are met. These include appointment and curbside delivery requirements.

We avoid the hub and spoke distribution system that many large carriers use and tend to partner with load and go carriers for improved transit times and less handling. We offer choice, flexibility and coverage, coast-to-coast.

SERVING YOUR TIME SENSITIVE PICK-UP AND DELIVERY REQUIREMENTS IN THE GREATER TORONTO AREA (GTA)

Our company continues on a path of growth and delivering greater value to our customers. We serve North America but find with our head office in Toronto, a high percentage of the shipments we handle start or end in the GTA.

That's why we introduced our own assets to better control both the first mile and final mile in our customers' supply chain. Our late model fleet of P&D vehicles is equipped for tailgate service and regular dock level operations. We run as far East as Pickering, North to Barrie, West to Kitchener/Waterloo and South to downtown Toronto. The added resource has proven to be a smart move for us and a great benefit for our customers.

CENTRAL CANADA IS OUR BACKYARD

Today, a significant portion of our activities serve the varied time constraints and delivery requirements of our Ontario and Quebec customers. These include:

- Overnight LTL service from Windsor to Quebec City and all points in between
- Intra-provincial hot shot, same day and overnight LTL
- Tailgate, residential, retail and inside door deliveries
- Difficult shipments requiring specialized care & handling
- Dry van service is our specialty

PROUD TO SERVE ATLANTIC CANADA'S LTL REQUIREMENTS

KTS offers scheduled LTL service to the provinces of New Brunswick, PEI, Nova Scotia and Newfoundland & Labrador. You can rely on us to arrange LTL shipments from all over Canada and the USA for delivery to major centres throughout Atlantic Canada. We can also coordinate the outbound LTL and truckload requirements of our Atlantic Canada customers to points throughout the balance of Canada and the USA.

WE'VE GONE THE EXTRA MILE TO BRING SHIPMENT VISIBILITY TO THE FOREFRONT

As a third party logistics provider we have carefully chosen the carriers that make up our partner network. As a result, we have interfaced with them to offer the shipment management data you need for each shipment, carrier and destination through a single portal at KTS.ca.

The site features a secure portal for customers and a Fast Track feature which provides up-to-the-minute shipment status by simply entering the shipment reference or waybill number. This secure feature includes shipment visibility for our GTA asset based fleet as well.

THE TRUST ADVANTAGE™

We understand that trust has to be earned. At KTS, those trusting relationships form the foundation of our business today. It's the best way for us to develop and maintain a business relationship. We value and trust our network of suppliers and it is of paramount importance to have a trusting relationship with you.

A PIONEER IN FREIGHT MANAGEMENT LOGISTICS

Our team is passionate about providing best in class freight management services. Our combined knowledge gives us additional insight into each customer's transportation challenges. In many cases, we become a seamless extension of our customers' traffic department, simplifying the supply chain and bringing convenience and value in the process.
